Risk Management and Risk Register

“The greatest risk facing a local authority is not being able to deliver the activity or services expected of the Council.”

Risk assessment is a systematic general examination of working conditions, workplace activities and environmental factors that will enable the Council to identify any and all potential risks inherent in the place or practices.

Based on a recorded assessment the Council should then take all practical and necessary steps to reduce or eliminate the risks, insofar as is practically possible. Making sure that all are made aware of the results of the risk assessment.

This document has been produced to enable the Parish Council to assess the risks that it faces and satisfy itself that it has taken adequate steps to minimise them. In conducting this exercise, the following plan was followed:

Identify the areas to be reviewed.

Identify what the risk may be.

Evaluate the management and control of the risk and record all findings.

Review, assess and revise if required.

What is Risk Management?

Risk is a threat that an event or action will adversely affect the council's ability to achieve its objectives, implement its strategies and provide its services. Risk management is the process by which risks are identified, evaluated, addressed and reviewed. The council recognises that it has a responsibility to take all reasonable and practical measures to safeguard its employees, the people it works with and provides services for; and to protect the natural and built environments for which it is responsible.

The council is aware that some risks cannot be eliminated fully and has in place a strategy that provides a structured systematic and focused approach to managing risk and including where necessary, the introduction of internal controls and/or appropriate use of insurance cover.

Objectives

The objectives of the risk management policy are to:

- Integrate risk management into the culture of the council
- Manage risk in accordance with best practice and legislative requirements
- Minimise loss, disruption, injury and damages
- Inform policy and operational decisions by identifying risks and their likely impact
- Raise awareness of the need for risk management

These objectives will be achieved by:

- Identification of risk
- Undertaking risk assessments
- Managing the risk and recording actions
- Incorporating risk management considerations into council processes
- Providing appropriate training
- Establishing clear roles, responsibilities and reporting lines
- Effective communication with, and active involvement of, employees

The risks are identified, assessed and recorded on the following risk register and will be reviewed by the council not less than annually.
